Meet David Durbin, National's Renewable Energy Specialist!

ALBUQUERQUE/SANTA FE, New Mexico (April 1, 2010) National Electric appoints David Durbin as the new renewable energy specialist. With the recent addition of its renewable energy division, National now offers design, estimating and technical support to help provide renewable energy solutions for its customers and their clients. Durbin will work "one on one" with customers at each step in the system design and pricing process. He will assist with on-site surveys to help determine the best solutions for each energy system as well as provide information and package pricing on products that meet each project's unique requirements.

Durbin, a member of National's team for over 14 years, has been involved in all aspects of quoting and providing electrical products to National's customers. He is also close to completing his NABCEP certification for renewable energy design. For more information about this new service please contact Durbin at 505-343-5371.

National Electric is an independent distributor of lighting and electrical distribution products for the industrial, commercial, utility, residential and renewable energy market segments. Locally owned and operated in New Mexico, National has two locations in Albuquerque and Santa Fe. It maintains its inventories in over one million cubic feet of warehouse space. National's corporate headquarters are located at 2200 Midtown Place NE, Albuquerque, NM 87107.
